Mr. Joseph A. Legare, Assistant Manager Environment and Stewardship U.S. Department of Energy, RFFO 10808 Highway 93, Unit A Golden, CO 80403-8200

RE: Acceptance, Certification for RCRA Clean Closure of Modules D, E and H of Building 707

Dear Mr. Legare and Mr. Nesta:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the "Division") has received the subject certification transmitted on October 1, 2004. The Division agrees, as the certification notes, that closure activities were performed under Clean Closure Option #1 of the Building 707 Closure Project Decommissioning Operations Plan.

The Division accepts that the Option #1 performance standards have been fulfilled as certified by a Colorado Registered Professional Engineer. The Division has inquired, and has been assured by Ms. Carolyn Hicks, that the phrase "information provided" refers to inspection records covering the RCRA operational history of the modules and that the records support the certification.

In the future, the Division requests that such certifications be specific. For Clean Closure Option #1, our preference is a statement that inspection records covered the entire operational history of the unit and that no spills had occurred, or were promptly mitigated.

If you have any questions concerning this correspondence, please contact me at 303-692-3367 or Harlen Ainscough at (303) 692-3337.

Sincerely.

Steven H. Gunderson RFCA Project Coordinator
